

SAURAV RANA

DevOps Engineer

7018507879 • sauravrana646@gmail.com • github.com/sauravrana646 • India

Summary

DevOps professional with 3 years of experience in cloud architecture and infrastructure automation, expert in Kubernetes and CI/CD pipeline development. My key achievements include reducing container image vulnerabilities from over 150 to fewer than 30, and achieving a 40% reduction in deployment time through CI/CD optimizations. Seeking a DevOps & Platform Engineer positions, where I bring my cloud architecture and infrastructure automation skills to support your mission of building a reliable, scalable, and automated platform foundation.

Skills

Cloud Platforms: AWS • GCP

Cloud Native & Containerization: Docker • Kubernetes • ArgoCD • Terraform • Ansible

Monitoring & Logging: Prometheus • Grafana • Loki • Fluent Bit • ELK

Distributed Systems: Kafka • Redis • Airflow

Programming & Scripting: Python • Bash

CI/CD & Automation: Jenkins • GitHub Actions

Experience

Dronapay Private Ltd

India

DevOps and Applications Engineer

05/2023 - Present

A company focused on realtime decisioning and data analytics platform.

- Collaborated with architects and engineers to design environments meeting business requirements and security specs. Ensured alignment with SLAs for optimal performance and reliability.
- Enhanced system security by reducing container image vulnerabilities from over 150 to fewer than 30, while implementing CIS benchmarks and industry best practices, significantly contributing to a more secure operational environment.
- Conducted application benchmarking and load testing, identifying performance bottlenecks and enhancing application throughput to handle 3,000 transactions per second (TPS).
- Developed and implemented hardened AMI's in alignment with the bank's Secure Configuration Documents, successfully provisioning secure infrastructure for VMs and Kubernetes clusters.
- Led compliance and security initiatives including SOC 2, VACA, VAPT, ISO 27001, and SAR Data Localization requirements by identifying gaps, generating audit reports, and driving remediation to achieve compliance readiness.
- Created comprehensive documentation and conducted training sessions on cloud technologies and best practices, fostering team knowledge and skill enhancement.
- Managed maintenance and upgrades of Cloud Infrastructure, Kubernetes clusters and Helm charts, ensuring seamless application deployment.
- Achieved a 20% reduction in infrastructure costs by optimizing cloud resource allocation and dynamically spawning instances as needed for end-of-day (EOD) activities, replacing the use of dedicated instances.
- Developed and executed disaster recovery plans, ensuring business continuity through effective backup and failover strategies.

Unthinkable Solutions

India

Junior Associate IT - DevOps

06/2022 - 03/2024

An IT solutions provider focused on innovative technologies.

- Oversaw the provisioning, deployment, and management of Kubernetes clusters and application workloads, utilizing Helm charts to streamline deployment processes and optimize operational efficiency.
- Developed Infrastructure as Code (IAC) solutions with Terraform, leading to a 70% decrease in manual efforts, provisioning errors and improved environment consistency.
- Established a robust monitoring system with Prometheus and Grafana, resulting in a faster incident response time and improved system uptime.
- Designed and implemented CI/CD pipelines using Jenkins, resulting in a 40% reduction in deployment time and increased deployment frequency to multiple times per day.

Education

Himachal Pradesh University

Himachal Pradesh, India

Bachelor of Technology | Information Technology

08/2018 - 07/2022
